

Dear customer,  
thank you for purchasing our product.

The system you got is still NOT enabled, you must install and update it to ensure a proper activation.

Before installing the software, it is highly recommended to check the minimum requirements of the PC, this allows a correct and quick installation.

- Dual-Core Processor (Physical cores) (Intel processors since 6th gen /AMD Ryzen series)
- Minimum screen resolution: 1600 x 900 for Race Evo and FlashPoint, DSManager and NewTrasdata softwares
- Maximum screen resolution: Full HD 1920 x 1080
- 2 USB Type-A/C Ports
- HDD at least 500GB
- Fast Internet connection
- Up-to-date browser (Edge/Chrome/Firefox)
- Windows 10/11 (32-64 bit) with at least 3Gb of RAM

For systems up to Windows 10, versions Starter, Home Edition and Educational are NOT supported.

Mac, Linux and Virtual Machines (to emulate Windows systems such as VMware, Oracle VM VirtualBox, Parallel etc.) are NOT supported.

**Before starting the installation, it is essential that the operating system in use is up to date and that there are no updates in progress or waiting to be executed.**

At the end of the installation procedure, you may need to restart your computer.

Once installed:

- Power the purchased device and connect it via USB to the PC
- Make sure the PC is connected to Internet
- Run the previously installed software
- Perform all the required updates

The system is active at the next start.

If necessary, you can get more information by accessing the FAQ/Tuning Tips or Ticket System section of your reserved area as indicated in the welcome email you received.

For any further questions or requests, you can contact your dealer.
